HAND BLENDED PIPE TOBACCO

Welcome to the Cornell&Diehl Family of Quality Hand-Blended Tobaccos!

Welcome! C&D is a pipe tobacco manufacturing company that specializes in blending the finest smoking tobaccos the old-fashioned way--in small batches, by hand! We currently manufacture some of the world's most popular pipe tobacco blends, including those created by G.L. Pease. **WE ARE NOT A STORE** . As a result we do have to maintain minimum order quantities and sell at MSRP but we are happy to either help you locate a C&D dealer or accommodate those who do not have a dealer in the area. Our policy is to work with customers and fine tune the blends until they get exactly what they want. To this end, please do not hesitate to call and discuss your preferences. Hebraica Series

A Series by Rabbi Ira Stone and William Serad

Ira Stone is a longtime pipe smoker and co-founder of the Christopher Morley Pipe Club in Philadelphia. He is a Rabbi in that city and teaches Jewish Philosophy at the Jewish Theological Seminary of America. All of the names in this series build on the Hebrew word "Or" meaning light.

PRICES INCLUDE F.E.T. \$37.33 per lb, 2oz Tin \$9.36, 8oz Tin \$24.42 , 1 lb Tin \$39.83

<p>#837 Or Olam (Light of the Universe): A classic Virginia and Perique blend with an unusual added note of exotic orientals. Red and golden Virginia are married to Perique and just a note of red Virginia cavendish is added for a smooth, sweet finish.</p>	<p>#840 Or L'yom (Daylight): Lighter in the contribution of orientals and Perique, this blend gets its character from the elegant red Virginias and smooth, round burley that are melded with toasted cavendish. A bowl starting the day sets a fine course for what follows.</p>
<p>#838 Halav U'Dvash (Milk and Honey): A true blend of both black and red VA cavendish as a base, given strength and presence with rough cut and dark fired Kentucky leaf, combined with exotic Middle Eastern orientals and specially processed with a traditional aromatic agent. The blend comes into being with a final hand-blended note of Perique. An aromatic for those who think they don't like aromatics.</p>	<p>#841 Sha'are Orah (Gates of Light): Named for a book of Jewish mysticism, this is a substantial blend with a special cubed burley base. It derives its subtle essence from the delicate interplay of Turkish leaf and Perique, further mellowed by stoved red Virginias. We are admonished to act with great care in this world, as we are not the final arbiters of actions we judge insignificant. Similarly, a microcosm of leaf adroitly balanced results in intricate and surprising flavors.</p>
<p>#839 Boker Or (Morning Light, a response to Boker Tov, or Good Morning): An unusual base of light yet rich orientals serves as a backdrop to a real Perique presence, enveloping stoved red Virginias sweetened with a bit of black cavendish. Perfect with a cup of strong coffee or on a morning stroll.</p>	

Aromatic Blends

The pipe smoker will find our aromatic blends drier than what they may be accustomed to. We use only a slight amount of propylene glycol in our aromatic blends as a carrier for the flavoring and as a humectant.. The result is a cooler, drier smoke than many other aromatics giving the pipe smoker a cleaner, more natural taste.

PRICES INCLUDE F.E.T \$37.33 per lb, 2oz Tin \$9.36, 8oz Tin \$24.42 , 1 lb Tin \$39.83

Serenity Series by William Serad

This is a series of blends cut to be easy to pack and easy to light, and formulated to enjoy all day. Each one is American in character: open, friendly and generous. Each is light in condimental leaf or flavorings with no diminution in flavor. Each has some proportion of cubed burley for a long, cool burn and an ample fullness. By design unchallenging, each is meant to be a constant companion.

<p>Comfort: For the bruised and buffeted perique lover, this blend offers succor. An unstinting perique component is supported by delicate sweetness from bright Virginia flake with a darker sweetness contributed by stoved cavendish. A fundament of cubed burley sustains the blend and your hopes.</p>	<p>Repose: A different sort of aromatic, not sweet but nutty. Repose adds Turkish with a flash of golden Virginia to a base of cubed burley. This is delicately topped with fine rum for a cool, fragrant smoke that won't fatigue or become cloying through the day.</p>
<p>Consolation: An Americanized English, it has the traditional latakia and Turkish (though in lighter amounts) in a Virginia flake base, but layered in are cubed burley and a discreet amount of toasted black cavendish for a round and slightly sweet finish.</p>	<p>Reverie: A blend of black cavendish, special cubed burley, touched with perique, Latakia and Turkish imbued with hazelnut.</p>
<p>Longevity II: A rework of the original, popular Longevity which contained Syrian Latakia.) This is a smooth, middle weight Balkan with Cyprian Latakia, Turkish and red Virginia.</p>

Ashbury: An alluring assortment of exotic oriental tobaccos is generously blended with bright and red Virginia leaf. Finally, just enough Cyprus Latakia is added to provide an alluring smokiness, resulting in a tobacco that can best be described as a light-medium Balkan mixture. This is the blend for gentlemen with a Bohemian spirit and a sense of adventure.	Lombard: Named for the famed winding, twisting street in San Francisco, Lombard starts with a base of red and bright Virginias. It is then enhanced with American "condimental" leaf, including an angel's share of perique. The twist in this Lombard? A delicate breath of Cyprus Latakia is added for a whisper of smokiness and a slightly deeper flavor. A gentle introduction to Latakia for the Virginia smoker, or just a delightful change of pace.
Fillmore: A thick sliced broken flake in the Scottish tradition. Ripe red Virginia tobaccos are combined with a generous measure of fine Louisiana Perique and then pressed to marry the components and deepen the flavors. The cakes are sliced and gently broken before tinning. Fillmore presents an elegant sweetness and delightful piquancy, enhanced by a creamy richness that develops throughout the bowl. Sit back and enjoy a lovely, leisurely smoke.	Montgomery: Virginias, Virginias, Virginias! Several grades of wonderful flue-cured leaf, from soft yellow to deep red, are combined with just a touch of dark-fired Kentucky for a little added richness. A special process, recovered from ancient archives, provides the finishing touch to this wonderful blend. Naturally sweet, and possessing subtle complexity, Montgomery presents delightful new dimensions for the lover of sophisticated Virginia blends.
Laurel Heights: Rich, ripe, red leaf forms the base of this wonderful Virginia blend. The flavours are deep and round, with a smooth, natural sweetness, and subtle notes of orange peel, roasted oats, leather and peat. The smoke develops richness as it progresses, delivering a long, clean finish that is never cloying or syrupy, with hints of malt and grapefruit. For lovers of darker, natural, unstoved Virginias.	Telegraph Hill: A sturdy foundation of Virginia tobaccos, each chosen for its particular character, is enhanced with fine flakes of perique for a refined smoking experience. Telegraph Hill is rich and flavorful, with a satisfying, lingering finish. Each sip builds upon the last, creating a marvelous edifice of taste and aroma. You won't worry about earthquakes if your pipe is filled with this wonderful blend.
Embarcadero: Rich, ripe red virginias are combined with top-grade Izmir leaf, pressed and aged in cakes, then sliced into flakes and tinned. The result is a wonderfully fragrant, natural blend with subdued sweetness, more <i>brut</i> than <i>demi-sec</i> , delightful toasty flavors, and hints of nuttiness and roasted coffee. Satisfying and refreshing; a comforting smoke, with enough complexity to keep it interesting.	Union Square: A blended, sliced cake of high grade flue cured leaf, from beautiful sweet brights to deep, earthy reds, without the added sugars and flavorings common to many Virginia flakes. It is rich on the palate, evolving in layers with the clean, natural sweetness of pure tobaccos. It offers a pleasant room note and a delightful finish. For those seeking the pure Virginia experience, we proudly present Union Square.

**G.L. Pease Old London Series
Chelsea Morning**

Greg introduces his new "Old London Series" with Chelsea Morning. Comprised of a variety of sweet red and yellow virginias, fragrant orientals, a measure of rich Cyprus Latakia, and a pinch of L.A. Poche's brilliant Acadian perique. The leaf is blended in layers and briefly pressed to integrate the flavours before being sliced and tumbled into short ribbons. The final form is between a broken-flake and a ribbon-cut tobacco. It's easy to pack, easy to smoke, and is a great blend with which to start the day with the morning cup. The flavours are lively and engaging, with a subtle fruitiness and gentle smokiness that wakes up the palate.

Two Friends Blends

History:

In October of 1999, Gregory Pease stayed with us during a short vacation. Of course, when two tobacco blenders get together, talk will turn to tobacco. During one of our little day trips into the beautiful North Carolina countryside, we talked about how much fun it would be to collaborate on some blends. Later that evening over a bottle of fine single malt, the idea for "Two Friends" tobaccos began to take shape. After a couple months of planning, with two per day phone calls, recipe ideas bouncing back and forth over email, lots of experimenting, and a little good natured arguing, the brand was born. Each of our unique styles comes through, but they work together, like two friends should.
